#### AUTOMATIC TRANSMISSION (DIAGNOSTICS)

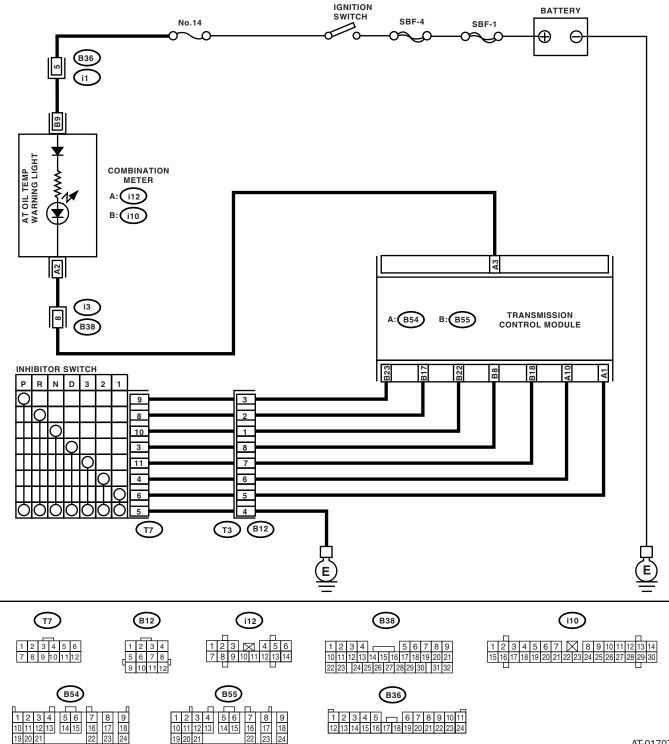

### 12. Diagnostic Procedure for AT OIL TEMP Warning Light A: AT OIL TEMP WARNING LIGHT DOES NOT COME ON OR GO OFF DIAGNOSIS:

The AT OIL TEMP warning light circuit is open or shorted.

### **TROUBLE SYMPTOM:**

- When the ignition switch is turned to ON (engine OFF), AT OIL TEMP warning light does not illuminate.
- When the on-board diagnostics is performed, AT OIL TEMP warning light remains illuminated.

### WIRING DIAGRAM:

### 4AT(H4SO)-25

# DIAGNOSTIC PROCEDURE FOR AT OIL TEMP WARNING LIGHT AUTOMATIC TRANSMISSION (DIAGNOSTICS)

	Step	Check	Yes	No
1	<b>CHECK AT OIL TEMP WARNING LIGHT.</b> Turn the ignition switch to ON (engine OFF).	Does the AT OIL TEMP warn- ing light illuminate?	Go to step 3.	Go to step 2.
2	<ul> <li>CHECK AT OIL TEMP WARNING LIGHT.</li> <li>1) Turn the ignition switch to OFF.</li> <li>2) Remove the combination meter.</li> </ul>	Is the AT OIL TEMP warning light bulb OK?	Go to step 4.	Replace the com- bination meter.
3	CHECK AT OIL TEMP WARNING LIGHT. Perform "Read Diagnostic Trouble Code (DTC)". <ref. 4at(h4so)-19,="" diag-<br="" read="" to="">nostic Trouble Code (DTC).&gt;</ref.>	Does the AT OIL TEMP warn- ing light blink?	A temporary poor contact of the con- nector or harness may be the cause. Repair the har- ness or connector in TCM, inhibitor switch and combi- nation meter.	Go to step <b>9</b> .
4	CHECK FUSE (No. 14). Remove the fuse (No. 14).	Is the fuse (No. 14) blown out?	Replace the fuse (No. 14). If replaced fuse (No. 14) is blown out easily, repair short circuit in harness between fuse (No. 14) and combina- tion meter.	Go to step 5.
5	<ul> <li>CHECK HARNESS CONNECTOR BETWEEN COMBINATION METER AND IGNITION SWITCH.</li> <li>1) Turn the ignition switch to ON (engine OFF).</li> <li>2) Measure the voltage between combination meter connector and chassis ground.</li> <li>Connector &amp; terminal (i10) No. 9 (+) — Chassis ground (-):</li> </ul>	Is the voltage more than 9 V?	Go to step <b>6</b> .	Repair the open circuit in harness between combina- tion meter and bat- tery.
6	CHECK COMBINATION METER. Measure the voltage between combination meter connector and chassis ground. Connector & terminal (i12) No. 2 (+) — Chassis ground (-):	Is the voltage less than 9 V?	Repair the combi- nation meter. <ref. idi-10,<br="" to="">Combination Meter Assembly.&gt;</ref.>	Go to step 7.
7	<ul> <li>CHECK OPEN CIRCUIT OF HARNESS.</li> <li>1) Turn the ignition switch to OFF.</li> <li>2) Disconnect the connector from combination meter connector.</li> <li>3) Measure the resistance of harness between combination meter.</li> <li>Connector &amp; terminal</li> <li>(B54) No. 3 — (i12) No. 2:</li> </ul>	Is the resistance less than 1 Ω?	Go to step <b>8</b> .	Repair the open circuit in harness between TCM and combination meter, and poor contact in cou- pling connector.
8	<ul> <li>CHECK INPUT SIGNAL FOR TCM.</li> <li>1) Connect the connector to TCM and combination meter.</li> <li>2) Turn the ignition switch to ON (engine OFF).</li> <li>3) Measure the voltage between TCM connector and chassis ground.</li> <li>Connector &amp; terminal</li> <li>(B54) No. 3 (+) — Chassis ground (-):</li> </ul>	Is the voltage less than 1 V?	Even if the AT OIL TEMP warning light illuminates, the circuit has returned to a nor- mal condition at this time. A tempo- rary poor contact of the connector or harness may be the cause. Repair the harness or connector in TCM.	Replace the TCM. <ref. 4at-77,<br="" to="">Transmission Con- trol Module (TCM).&gt;</ref.>

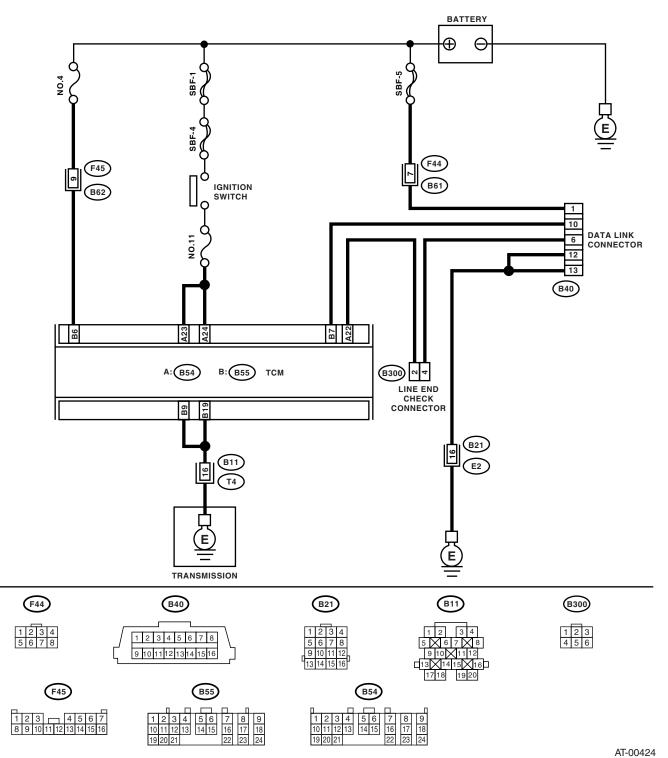

## DIAGNOSTIC PROCEDURE FOR AT OIL TEMP WARNING LIGHT

AUTOMATIC TRANSMISSION (DIAGNOSTICS)

	Step	Check	Yes	No
9	<ul> <li>CHECK INHIBITOR SWITCH.</li> <li>1) Connect the Subaru Select Monitor to data link connector.</li> <li>2) Turn the ignition switch to ON.</li> <li>3) Turn the Subaru Select Monitor to ON.</li> <li>4) Read the data of range switch using Subaru Select Monitor.</li> <li>Range switch is indicated in ON ←→ OFF.</li> </ul>	When each range is selected, does the LED of Subaru Select Monitor light up?	Go to step 10.	Check the inhibi- tor switch circuit. <ref. to<br="">4AT(H4SO)-91, CHECK INHIBI- TOR SWITCH., Diagnostic Proce- dure for No-diag- nostic Trouble Code (DTC).&gt;</ref.>
10	<ul> <li>CHECK SHORT CIRCUIT OF HARNESS.</li> <li>1) Disconnect the connector from TCM.</li> <li>2) Remove the combination meter.</li> <li>3) Disconnect the connector from combination meter.</li> <li>4) Measure the resistance of harness connector between TCM and chassis ground.</li> <li>Connector &amp; terminal</li> <li>(B54) No. 3 — Chassis ground:</li> </ul>	Is the resistance less than 1 MΩ?	Check the TCM power supply and ground line. <ref. to 4AT(H4SO)-28, CHECK POWER SUPPLY AND GROUND LINE, Diagnostic Proce- dure for AT OIL TEMP Warning Light.&gt;</ref. 	Repair the short circuit in harness between combina- tion meter connec- tor and TCM connector.

### DIAGNOSTIC PROCEDURE FOR AT OIL TEMP WARNING LIGHT

AUTOMATIC TRANSMISSION (DIAGNOSTICS)

	Step	Check	Yes	No
1	<b>CHECK BATTERY TERMINAL.</b> Turn the ignition switch to OFF.	Is there poor contact at battery terminal?	Repair or tighten the battery termi- nal.	Go to step 2.
2	<ul> <li>CHECK POWER SUPPLY OF TCM.</li> <li>1) Disconnect the connector from TCM.</li> <li>2) Turn the ignition switch to ON.</li> <li>3) Measure the voltage between TCM connector and chassis ground.</li> <li>Connector &amp; terminal</li> <li>(B55) No. 6 (+) — Chassis ground (-):</li> </ul>	Is the voltage 10 — 13 V?	Go to step 4.	Go to step 3.
3	CHECK FUSE (NO. 4). Remove the fuse (No. 4).	Is the fuse (No. 4) blown out?	Replace the fuse (No. 4). If replaced fuse (No. 4) has blown out easily, repair short circuit in harness between fuse (No. 4) and TCM.	Repair the open circuit in harness between fuse (No. 4) and TCM, or fuse (No. 4) and battery, and poor contact in cou- pling connector.
4	<ul> <li>CHECK IGNITION POWER SUPPLY CIR- CUIT.</li> <li>1) Turn the ignition switch to ON (engine OFF).</li> <li>2) Measure the ignition power supply voltage between TCM connector and chassis ground.</li> <li><i>Connector &amp; terminal</i> (B54) No. 23 (+) — Chassis ground (-): (B54) No. 24 (+) — Chassis ground (-):</li> </ul>	Is the voltage 10 — 13 V?	Go to step <b>6</b> .	Go to step 5.
5	CHECK FUSE (NO. 11). Remove the fuse (No. 11).	Is the fuse (No. 11) blown out?	Replace the fuse (No. 11). If replaced fuse (No. 11) has blown out easily, repair short circuit in harness between fuse (No. 11) and TCM.	Repair the open circuit in harness between fuse (No. 4) and TCM, or fuse (No. 4) and battery, and poor contact in cou- pling connector.
6	<ul> <li>CHECK HARNESS CONNECTOR BETWEEN TCM AND TRANSMISSION.</li> <li>1) Turn the ignition switch to OFF.</li> <li>2) Disconnect the connector from TCM and transmission.</li> <li>3) Measure the resistance of harness between TCM and transmission connector.</li> <li><i>Connector &amp; terminal</i> (B54) No. 9 — (B11) No. 16: (B56) No. 19 — (B11) No. 16:</li> </ul>	Is the resistance less than 1 $\Omega$ ?	Go to step 7.	Repair the open circuit in harness between TCM, transmission har- ness connector, and poor contact in coupling con- nector.
7	CHECK HARNESS CONNECTOR BETWEEN TRANSMISSION AND TRANSMISSION GROUND. Measure the resistance of harness between transmission and transmission ground. Connector & terminal (T4) No. 16 — Transmission ground:	Is the resistance less than 1 $\Omega$ ?	Go to step 8.	Repair the open circuit in harness between transmis- sion and transmis- sion ground.
8	CHECK POOR CONTACT IN CONNECTORS.	Is there poor contact in control module power supply, ground line and data link connector?	Repair the con- nector.	Replace the TCM. <ref. 4at-77,<br="" to="">Transmission Con- trol Module (TCM).&gt;</ref.>
